GÜRTES, inşaat sektöründeki yapısal mimari ve uygulamalar üzerine teknolojik çalışmalar yürütünen bir firmadır. Ayrıca, yerli ve yabancı firmalarla iş ortaklıkları yaparak şirketlerini pazarlarda temsil eder ve müşterilere özel çözümler sunar. Ar-Ge ve sektörle ilgili teknolojik yatırımlar yaparak müşterilere değer katmaya odaklanan GÜRTES, projelerde müşteri memnuniyetini ve sürekliliğini sağlamak için organizasyonel yapıyı en üst düzeyde bilgi, araştırma ve deneyimle birleştirir. Ticari, teknik ve mühendislik alanlarında faaliyet gösteren firma, proje yöneticisi veya konsorsiyum lideri olarak ithalat, ihracat ve taahhüt işlerini üstlenir ve tüm proje sorumluluğunu eğitimli personeliyle birlikte yürütür.

GÜRTES is a company that conducts technological research and development in the construction sector, focusing on structural architecture and applications. The company also forms partnerships with specialized local and international firms, representing them in both domestic and foreign markets. By investing in R&D and technological advancements relevant to the industry, GÜRTES takes pride in offering its clients exclusive and value-added solutions. As a solution-oriented entity, GÜRTES operates with an organized structure aimed at achieving customer satisfaction and continuity in projects, solutions, and applications through the integration of top-level knowledge, research, and experience among all its employees. Acting as a commercial, technical, and engineering firm, GÜRTES assumes the role of project manager or consortium leader in projects requiring collaboration, handling import, export, and contracting tasks. In such cases, the company takes full project responsibility, managing all logistical and engineering activities with its trained technical and administrative staff.

STEEL CONSTRUCTION DESING / ÇELİK KONSTRÜKSİYON TASARIMI

We have 5000 M2 closedsteel processing center. There are all kinds of weldingsystem in our facility.

We never compromise onquality with our certifiedwelding operators. All ourwelded products aremanufactured inaccordance with thestandards.

Our factory has steel cutting machines for cutting twistingmachines, plasma cutting machines as well as laser cuttingmachines for precision cutting. With our furnace paintsystems, we have hot dip galvanizing line for metal surfacecoating. We have rool form machines for the production of c profile forexterior cladding systems

Project planning and static plans are preparedaccording to the wishes of our customers by our expertengineers. All manufacturing work orders are removedby this team and all processes are followed inaccordance with our quality standards. Our assemblyteam performs a practical installation without a secondapplication in the field.

PRODUCTION ACCORDING TO CUSTOMER DEMAND MÜŞTERİ TALEBİNE GÖRE ÜRETİM

In line with the demands and demands of our customers, there are many jobs that we customize in steel, stainless and aluminum materials. Customer satisfaction is important to us in all our work without compromising on quality. The success we achieved in our light steel applications, especially in structural architecture, has been presented to the appreciation of our valued customers. In our lightsteel applications, agricultural special greenhouses are in different business lines that we produce.

Müşterilerimizin talep ve talepleri doğrultusunda çelik, paslanmaz ve alüminyum malzemelerde özelleştirdiğimiz birçok iş var. Tüm çalışmalarımızda kaliteden ödün vermeden müşteri memnuniyetibizim için önemlidir. Hafif çelik uygulamalarımızda, özellikle yapısal mimaride elde ettiğimiz başarı siz değerli müşterilerimizin beğenisine sunulmuştur. Hafif çelik uygulamalarımızda tarımsal özelseralar da üretimi gerçekleştirdiğimiz farklı iş kolları içerisindeider.

ARCHITECTURAL DESIGN / MİMARI TASARIM

Our company operates as a solution partner in practical and applied fields such as architecture, design, project management, engineering and consultancy. With our young and dynamic design team and experienced management team, we are bringing our innovative ideas to our customers with our strong technical infrastructure and broad industry experience.

Project management our architectural project design and project management team carries out projects in various scales at home and abroad for the leading companies in the field and individuals who have success and rigor at the core of their business.

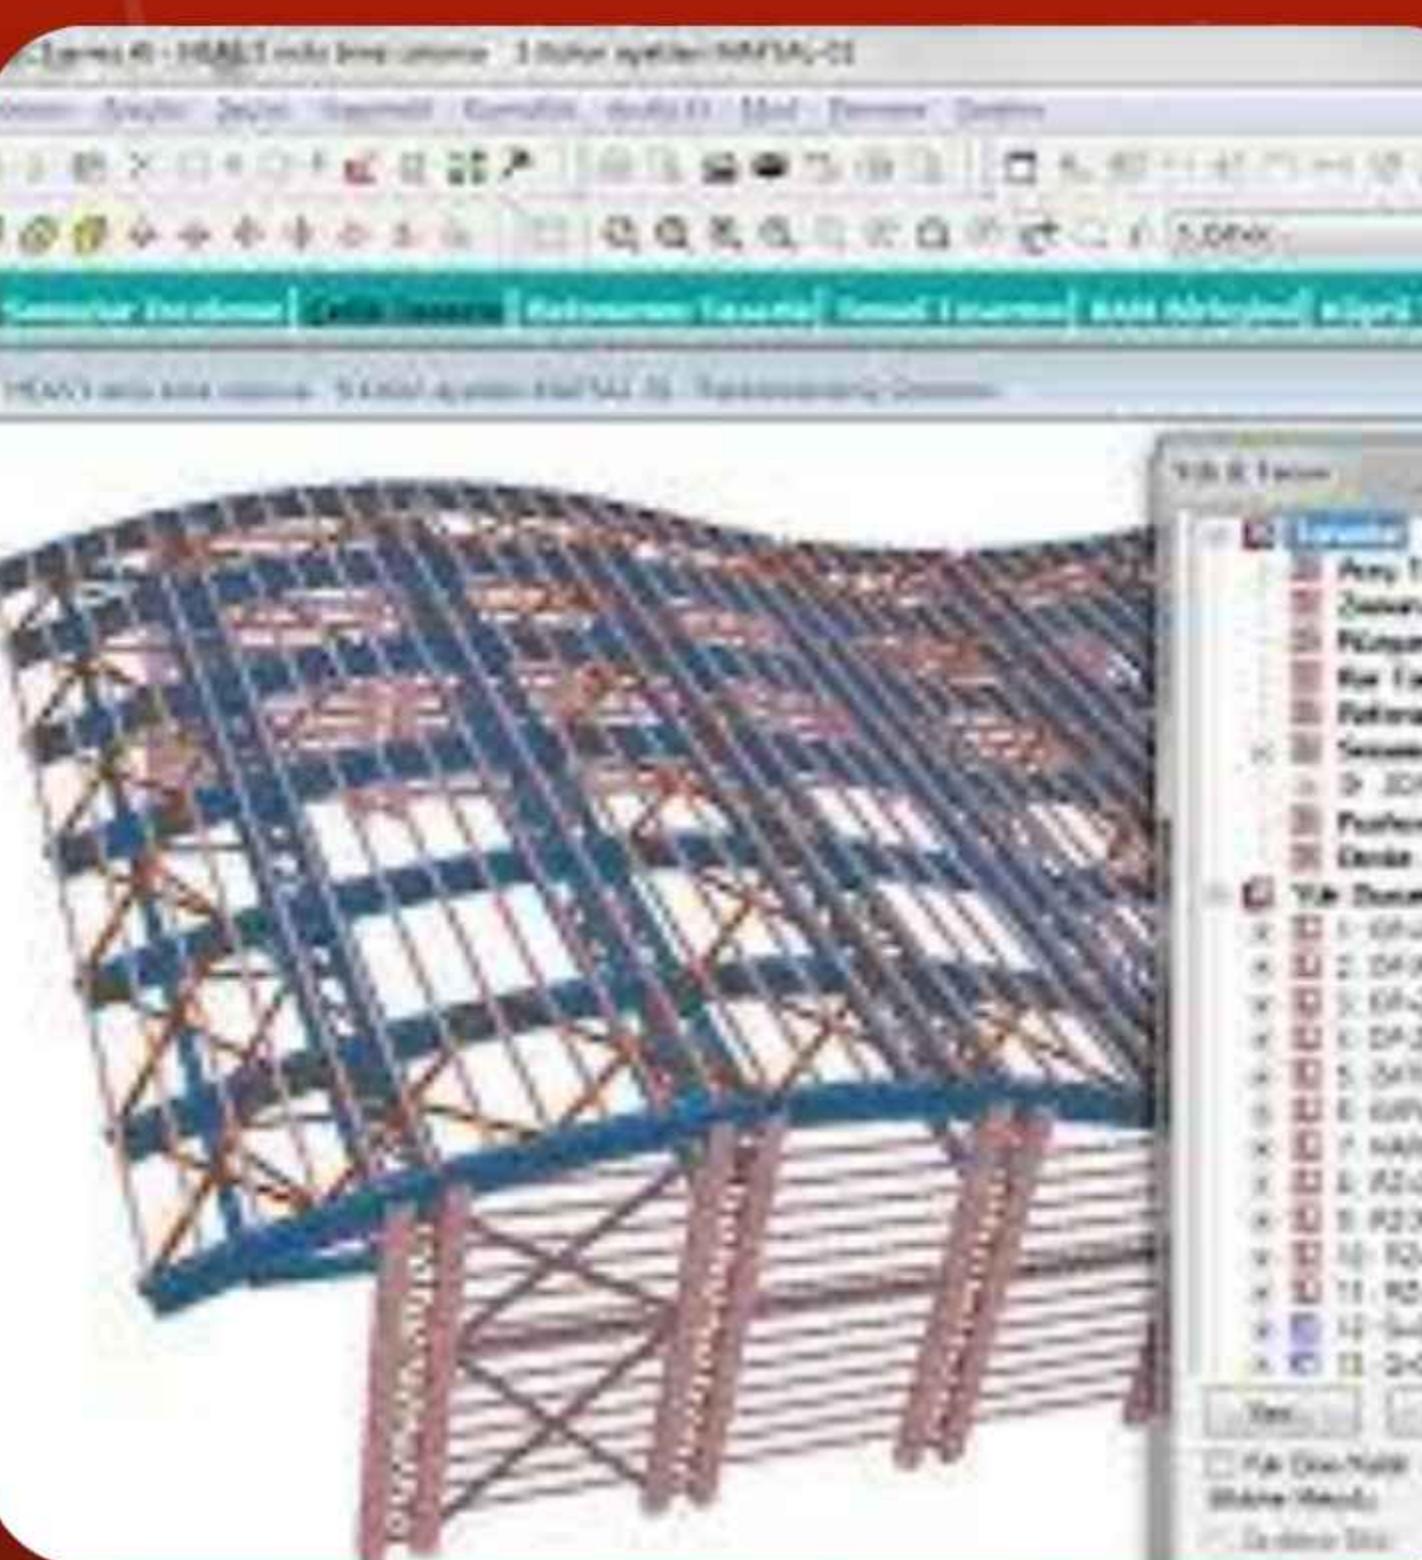

Residential, mixed-use building, commercial buildings, industrial building projects, hotel projects, office projects, restaurant projects, cafe projects have developed design and project processes based on technical accuracy and iconic foundations by considering customer needs and tastes.

Firmamız mimari, tasarım, proje yönetimi, mühendislik ve danışmanlık gibi pratik ve uygulamalı alanlarda çözüm ortağı olarak faaliyet gösteriyoruz. İşverenlerimize genç ve dinamik tasarım ekibimiz ve deneyimli yönetim kadromuzla Güçlü teknik altyapımız ve geniş sektör deneyimimiz ile özelleştirilmiş çözümleri müşterilerimize sunarak inovatif fikirlerimizi hayatı geçiriyoruz.

Proje Yönetimi Mimari proje tasarım ve Proje yönetimi ekibimiz, alanında öncü firmalar ve işinin temelinde başarı yetitizlik olan bireyler için yurt içi ve yurt dışında çeşitli ölçeklerde projeler yapar. Konut, karma kullanılmış bina, ticari yapılar, endüstriyel yapı proje, otel projeleri, ofis projeleri, restoran projeleri, kafe projelerini tasarım temelinde müşteri ihtiyaç ve zevklerini göztererek teknik doğruluk ve ikonik temeller esas alınarak tasarım ve proje süreçleri geliştirmiştir ve projelerini üretermiştir.

CONSTRUCTION STATIC PROJECTING / İNŞAAT STATİK PROJELERİNDİRME

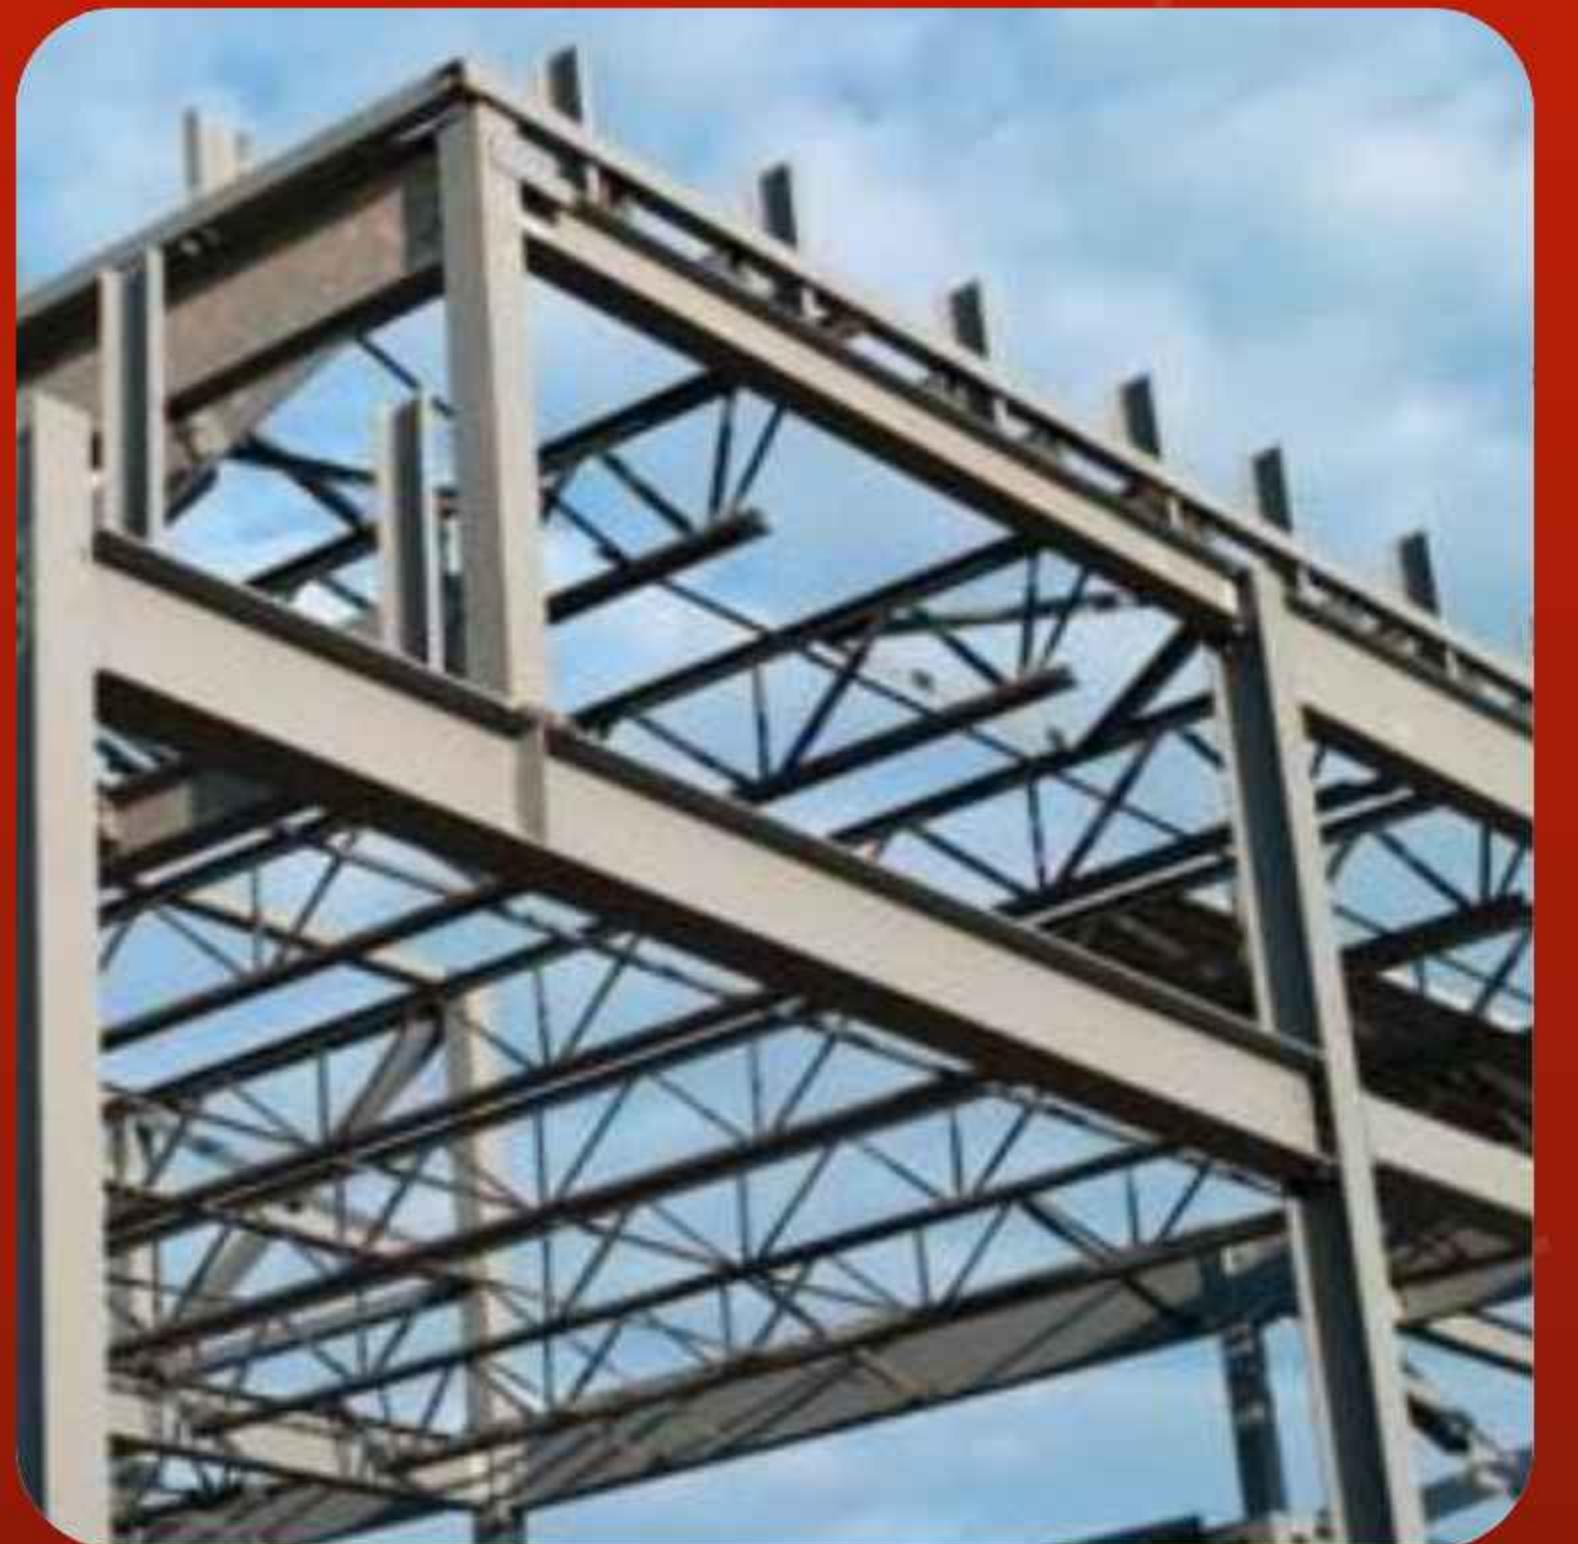

One of the two basic projects that make up a building is an architectural project and the other is a static project. In the architectural project, the target is to plan the building according to user requests and needs. The goal of the static project is the realization of the architectural project.

The architect projects in detail the spaces to meet the needs of the building to be built, their relations with each other, their proportions and their external appearance. It draws floor plans separately for each floor of the building. Expresses the floor plans from the top of the floor in the direction it is facing down. In the floor plan, stairs, walls, doors, windows, covering types are detailed with their dimensions. Columns, beams, floors for the carrier system are not shown in the architectural project. (Structural system is designed by a civil engineer with a static project as we will mention below.)

Bir yapıyı oluşturan iki temel projeden birisi mimari proje diğeri statik projedir. Mimari projede hedef yapının kullanıcı istek ve ihtiyaçlarına göre planlanmasıdır. Statik projede hedef mimari projenin hayatı geçirilmesidir. Mimar, inşa edilecek yapının ihtiyaç talebini karşılayacak mekânları, birbirleri ile olan ilişkilerini, oranlarını vedîş görünüşlerini ayrıntılı bir şekilde projelendirir. Yapının farklı her katı için ayrı ayrı kat planlarını çizer. Kat planlarını döşeme üstünden keserek aşağı baktığı yönde ifade eder. Kat planında merdivenler, duvarlar, kapılar, pencereler, kaplama türleri ölçülerile birlikte detaylandırılır.

Mimari projede taşıyıcı sisteme yönelik kolonlar, kirişler, döşemeler gösterilmez. (Taşıyıcı sistem aşağıda degeneceğimiz şekilde inşaat mühendisler tarafından statik proje ile projelendirilir.) Firmamız tüm projelerinde konusunda uzman mühendis ekibimiz ile statik projelerimizi hazırlamaktayız.

INDUSTRIAL STRUCTURES / SANAYİ YAPILARI

Kale Aero

Factory Construction: GÜRTES has completed and delivered architectural, mechanical, static, steel fabrication, electrical projects and mechanical projects in this project.

Our project delivery date is March 2019.

Project completion amount is \$ 17.000.000,00

Address: KALE HAVACILIK SAN. TİC. A.Ş Tuzla Serbest Bölge./ İSTANBUL

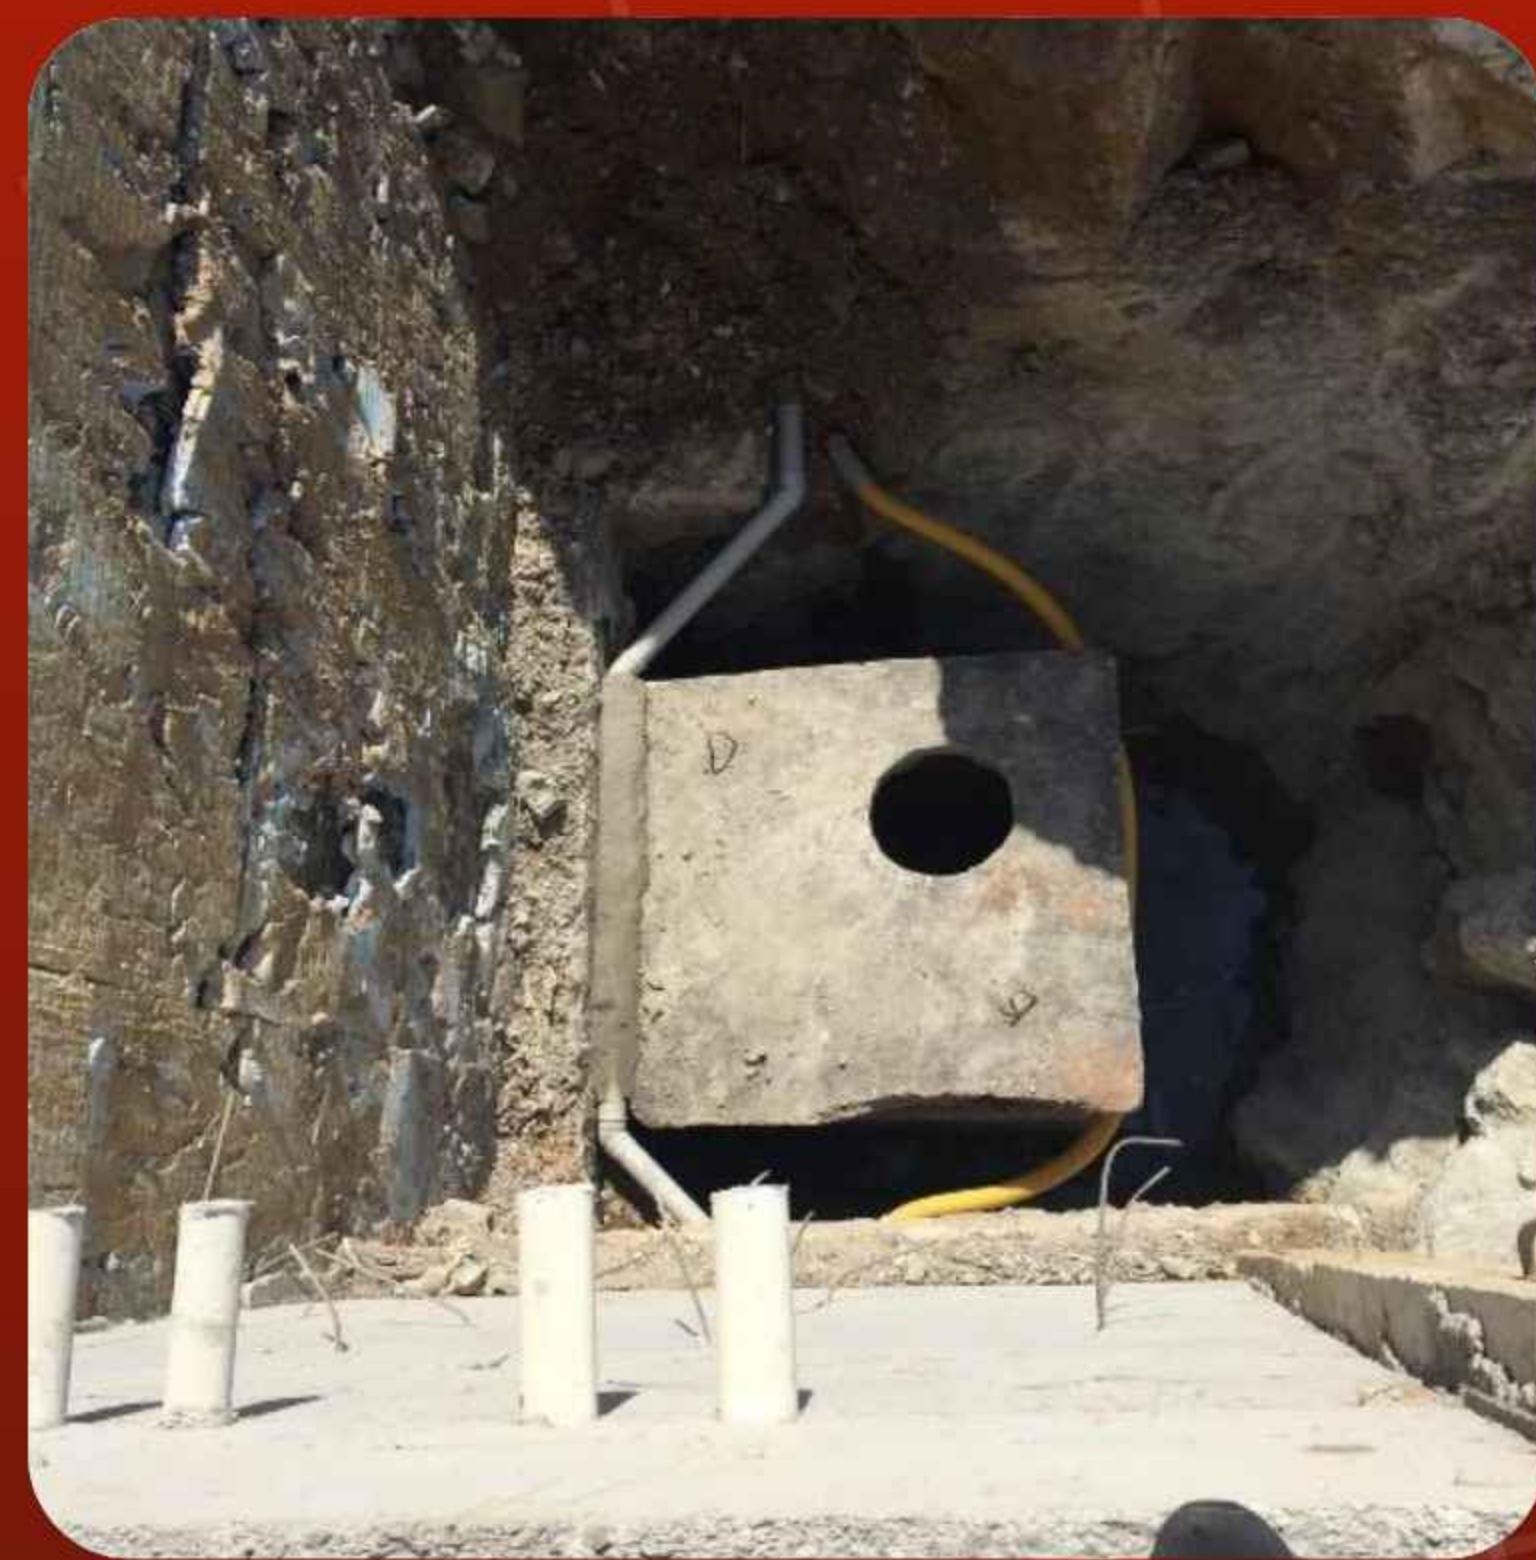

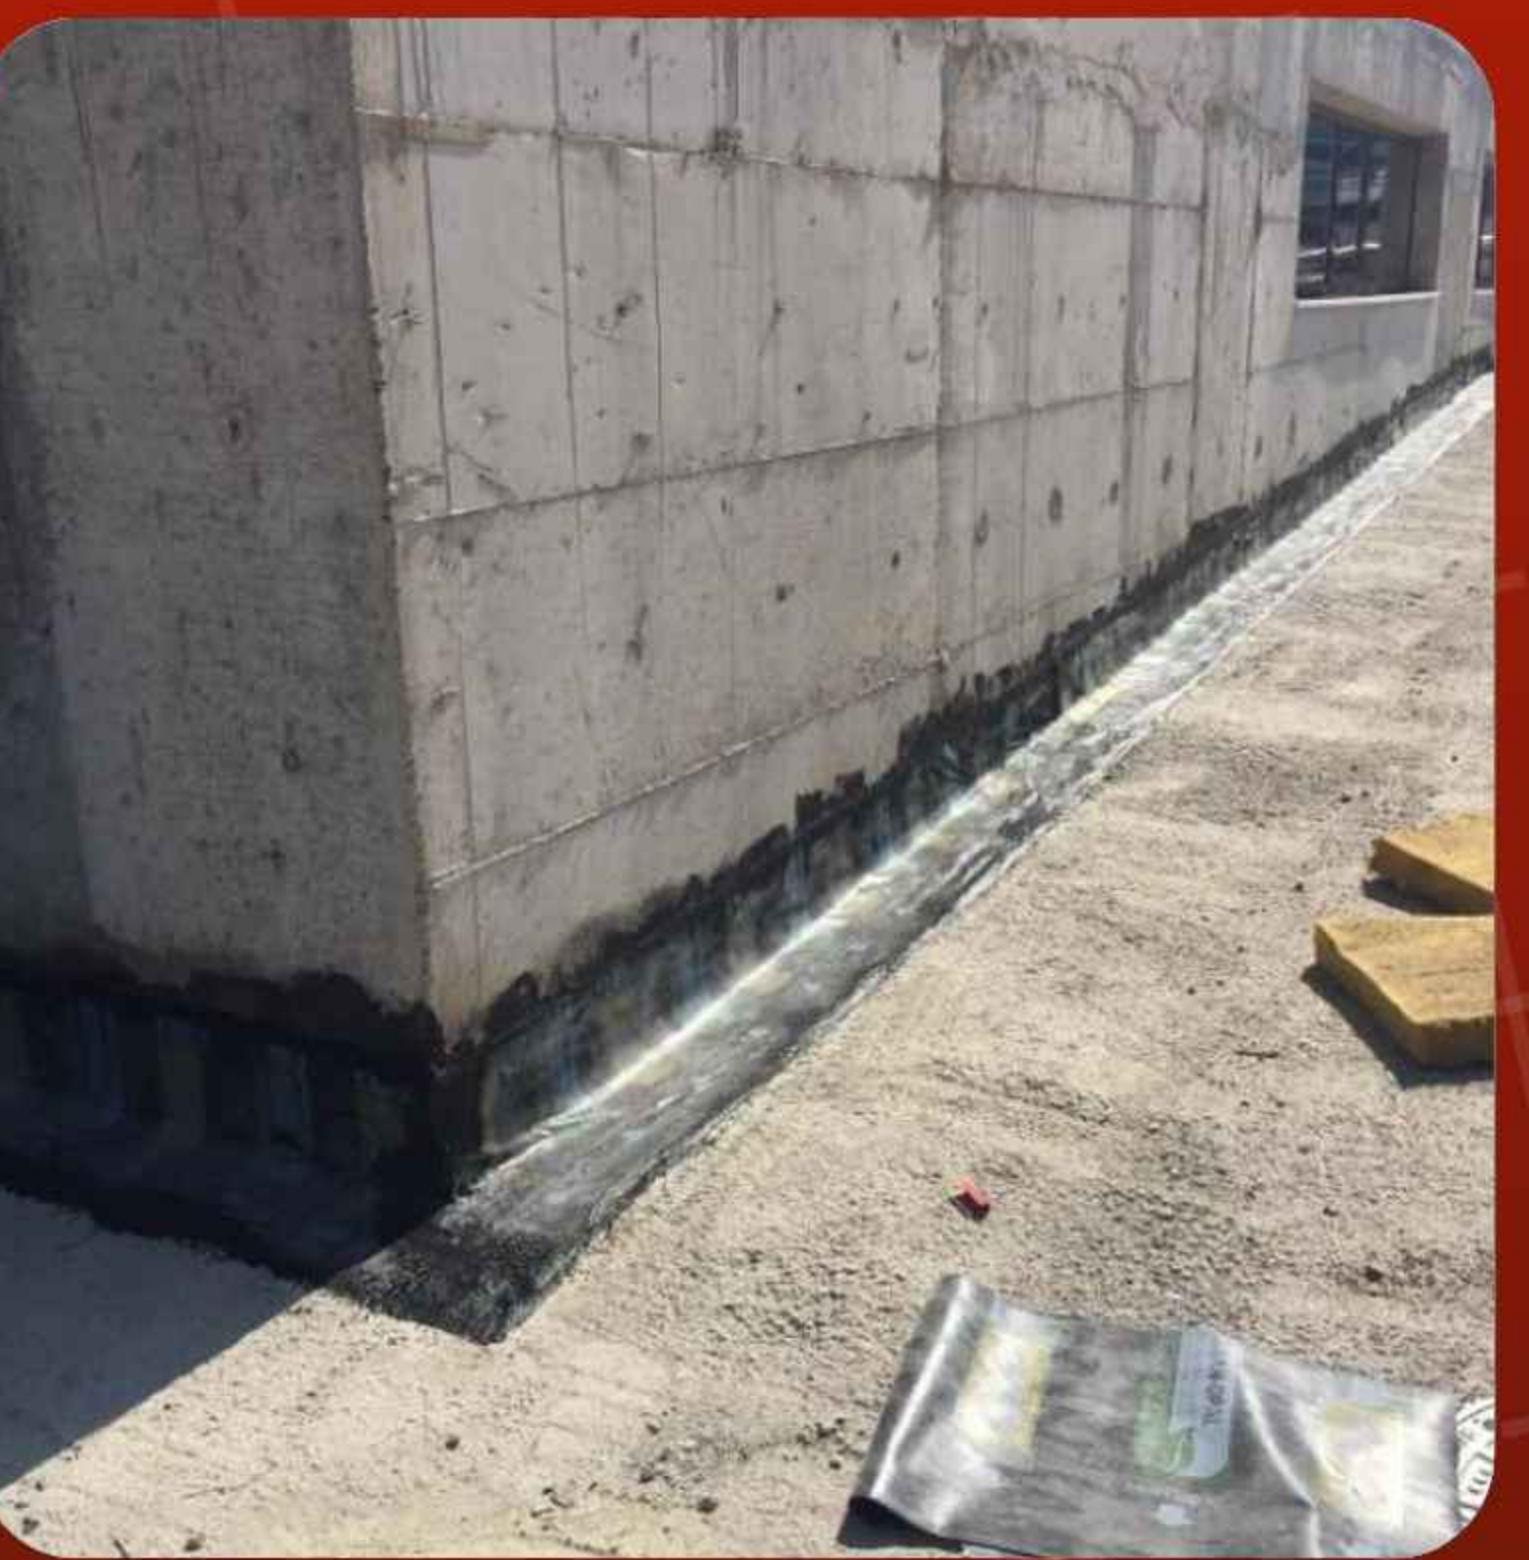

INDUSTRIAL STRUCTURES / SANAYİ YAPILARI

We have produced special solutions for light steel, high ceiling and wide area requirements. We have shaped the needs of our customers with our low quality applications with high usable costs in line with the demands of our customers

INDUSTRIAL STRUCTURES / SANAYİ YAPILARI

REINFORCED CONCRETE BUILDINGS / ARMATÜRLÜ BETON YAPILAR

Ovacik villa project, total twenty-one villa construction. GÜRTES has carried out the construction works for all structures, heating, cooling, electrical and mechanical works. In this project, Gürtes prepared and implemented architectural projects and static projects.

REINFORCED CONCRETE BUILDINGS / ARMATÜRLÜ BETON YAPILAR

Kerpe Villas and twelve villa projects. GÜRTES designed and implemented architectural, static, mechanical and electrical projects in this project. The project was delivered and delivered in a short period of time as a whole.

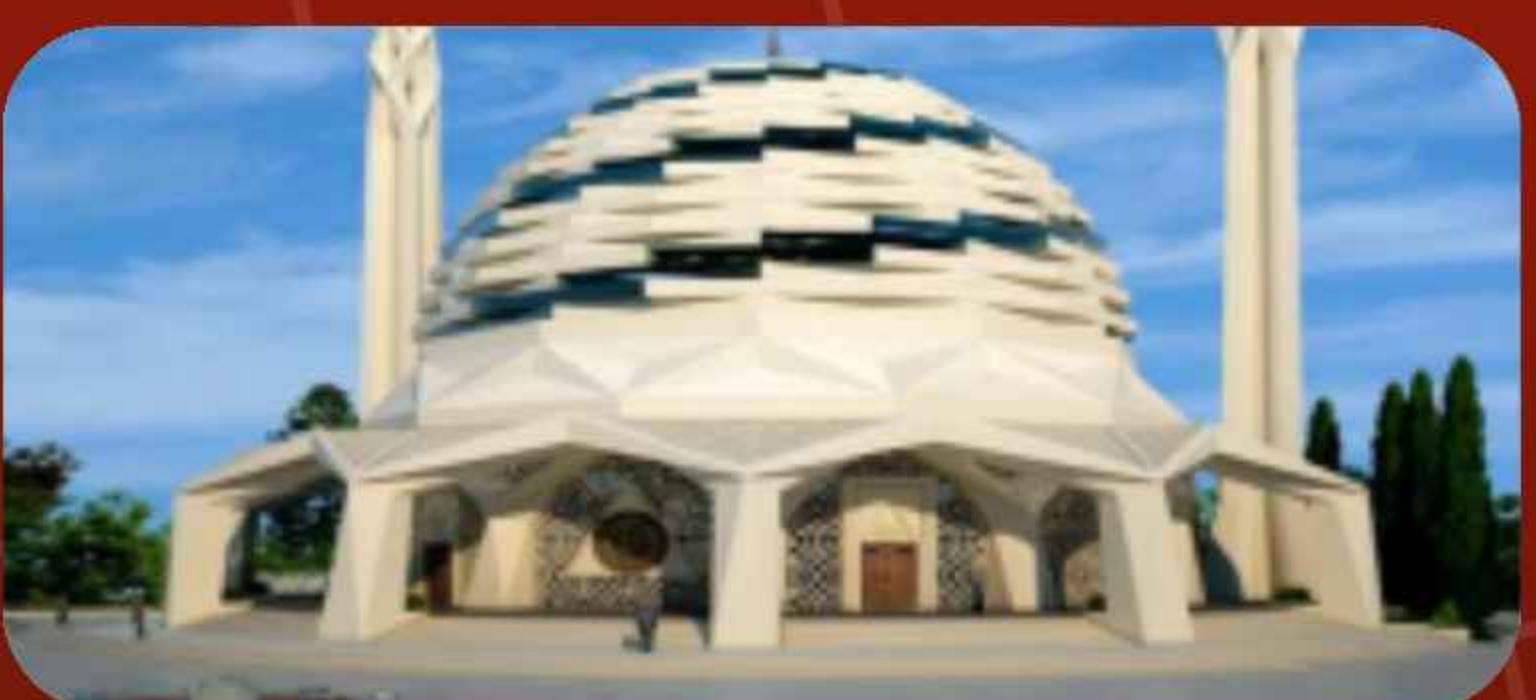

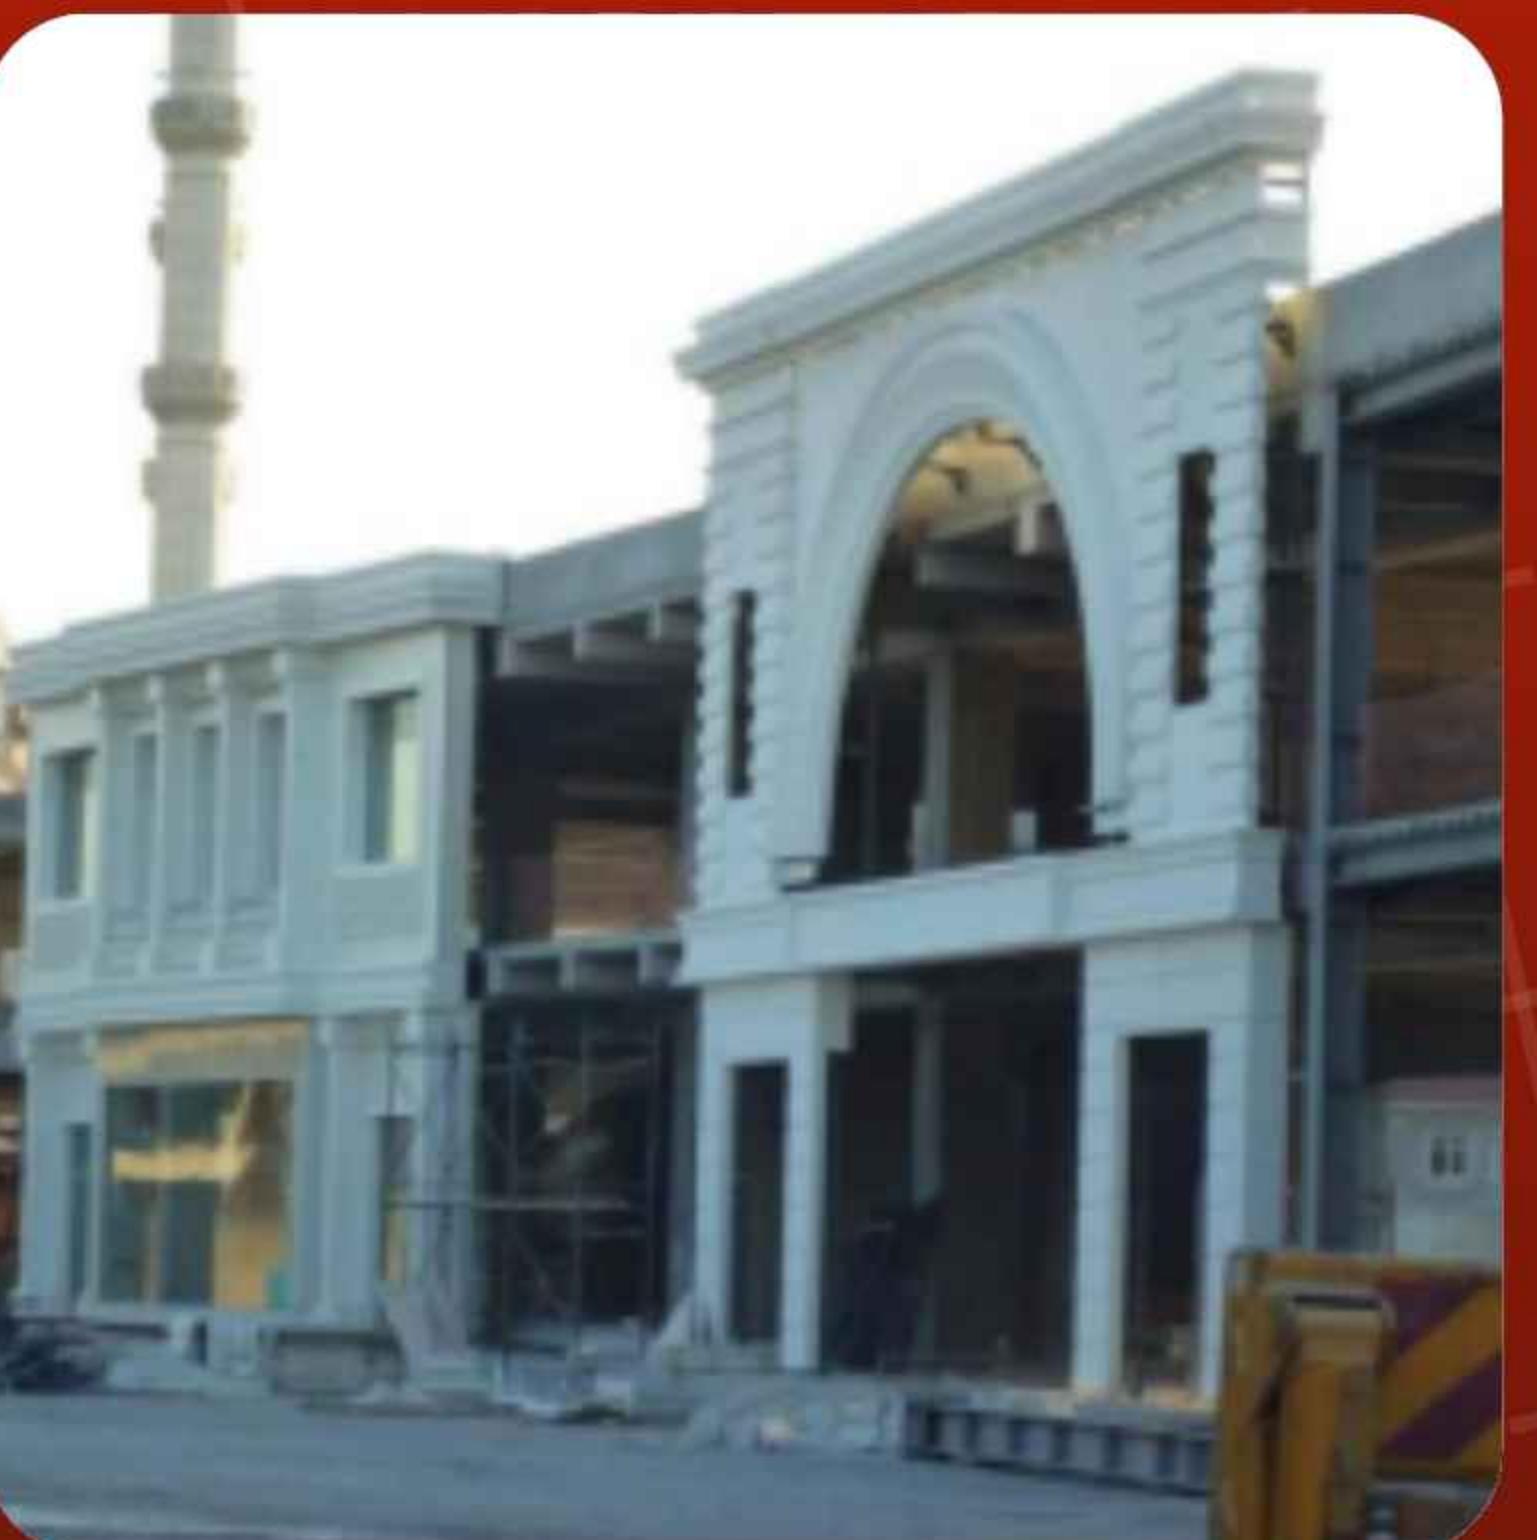

LIGHT STEEL / HAFİF ÇELİK

LIGHT STEEL TOKİ HOME / HAFIF ÇELİK TOKİ EVİ

REINFORCED CONCRETE BUILDINGS / ARMATÜRLÜ BETON YAPILAR

Some of our projects managed under the leadership of our project manager Abdulmutalip İpek.

PREFABRICATED PRODUCTION PLANT / PREFABRİK ÜRETİM TESİSİ

Our factory is located in Düzce Akçakoca. Our total closed area is 10000 m² and our production capacity is 20000 m³ per month. Our company produces Reinforced Concrete Prefabricated Building Elements. Apart from this activity, it produces Bridge beams and bearing systems.

Fabrikamız Düzce Akçakoca mevkiinde dir. Toplam Kapalı Alanımız 10000 M² olup Üretim Kapasitemiz Aylık 20000 M³ dür. Firmamız Betonarme Prefabrik Yapı Elemanları üretimi yapar. Bu faaliyetin dışında Köprü kiriş ve taşıyıcı sistemler üretmektedir.

ÜRGÜP STUDENT DORMITORY / ÜRGÜP ÖĞRENCİ YURDU

Ürgüp Öğrenci Yurdu'nun hafif çelik projesi, modern ve dayanıklı bir yapıya sahip olacak şekilde tasarlanmıştır. Hafif çelik, yapıya güç ve esneklik sağlar ve aynı zamanda hızlı bir inşaat süreciyle sonuçlanır. Yapı, öğrencilerin konforunu ve güvenliğini ön planda tutacak şekilde planlanmıştır.

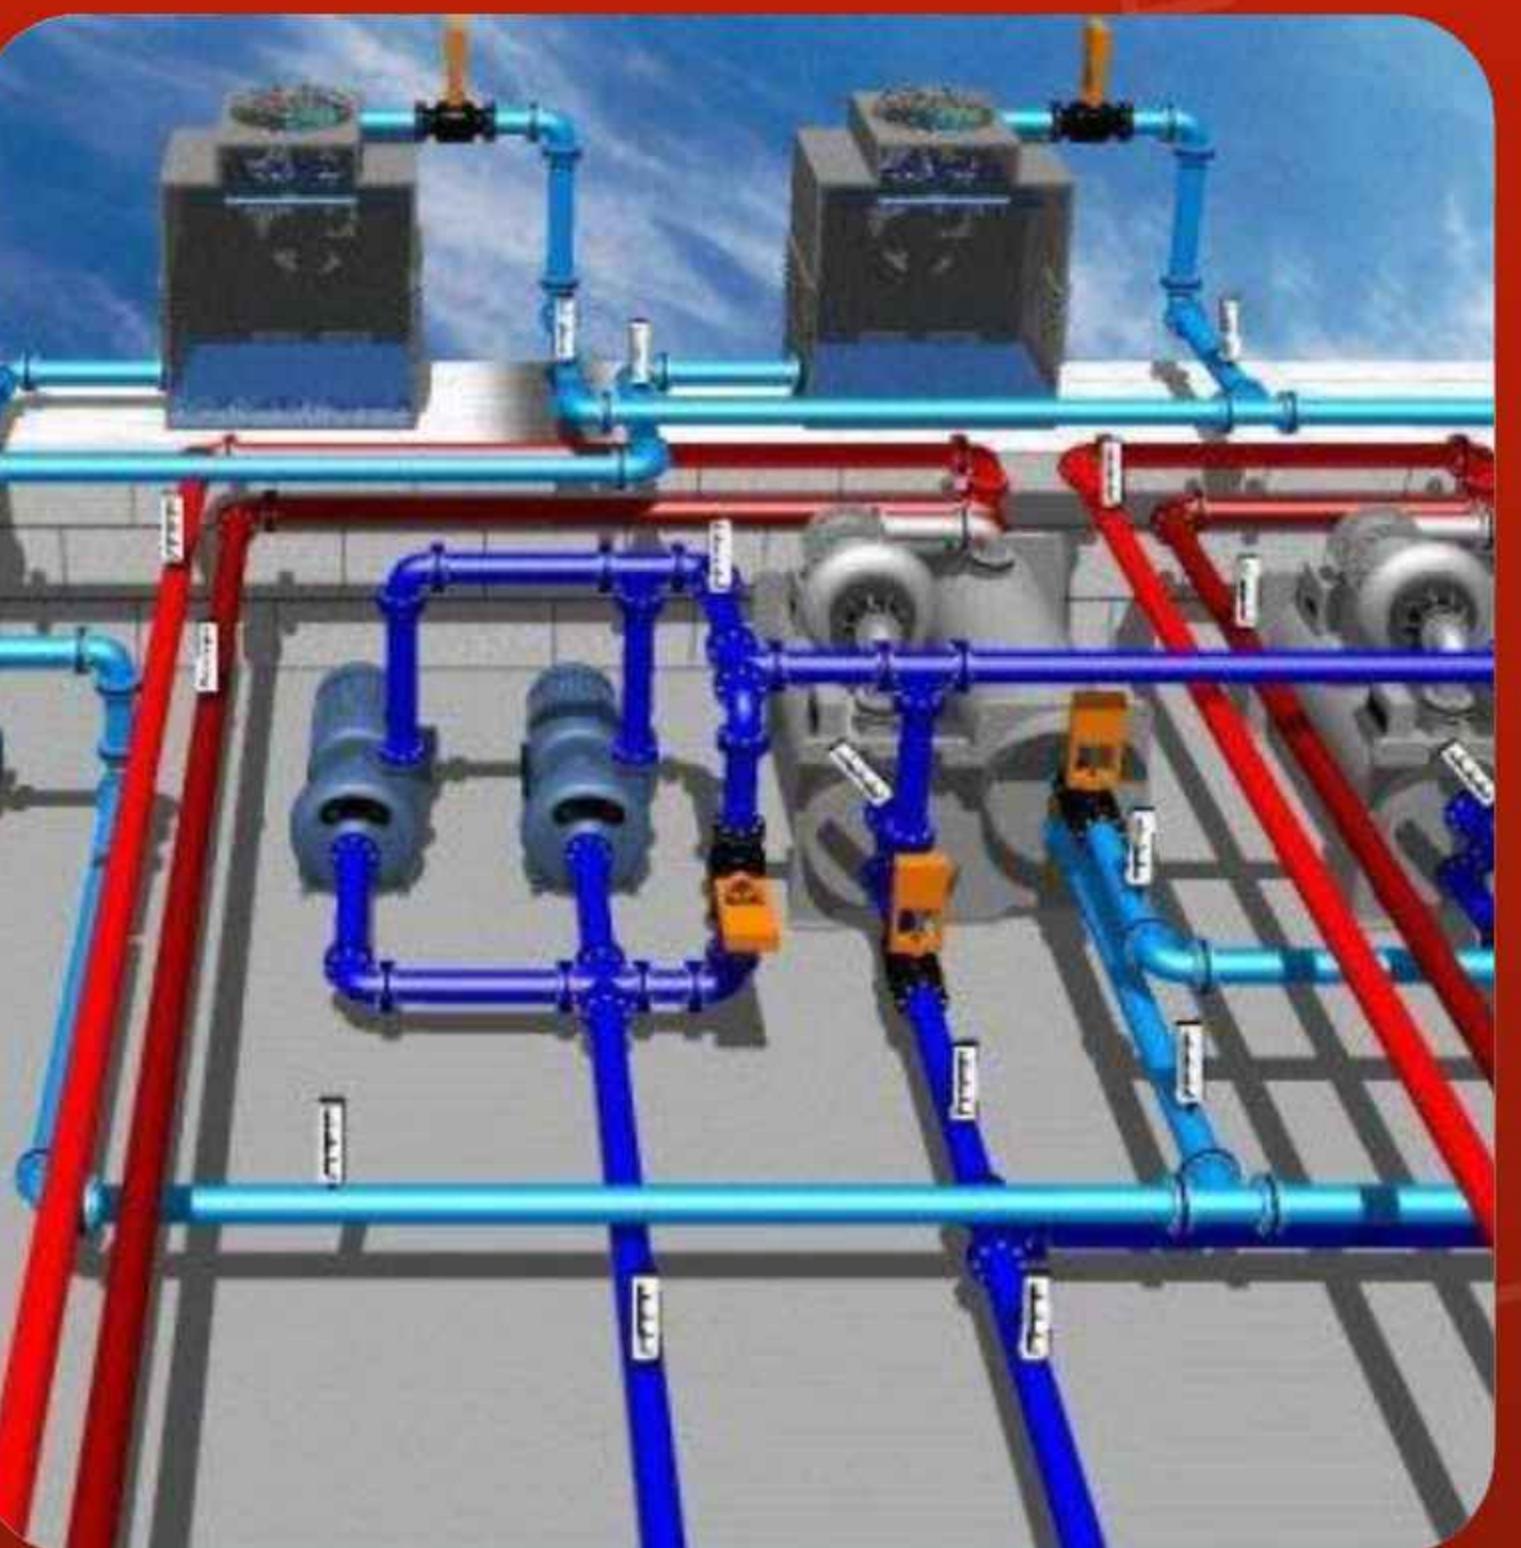

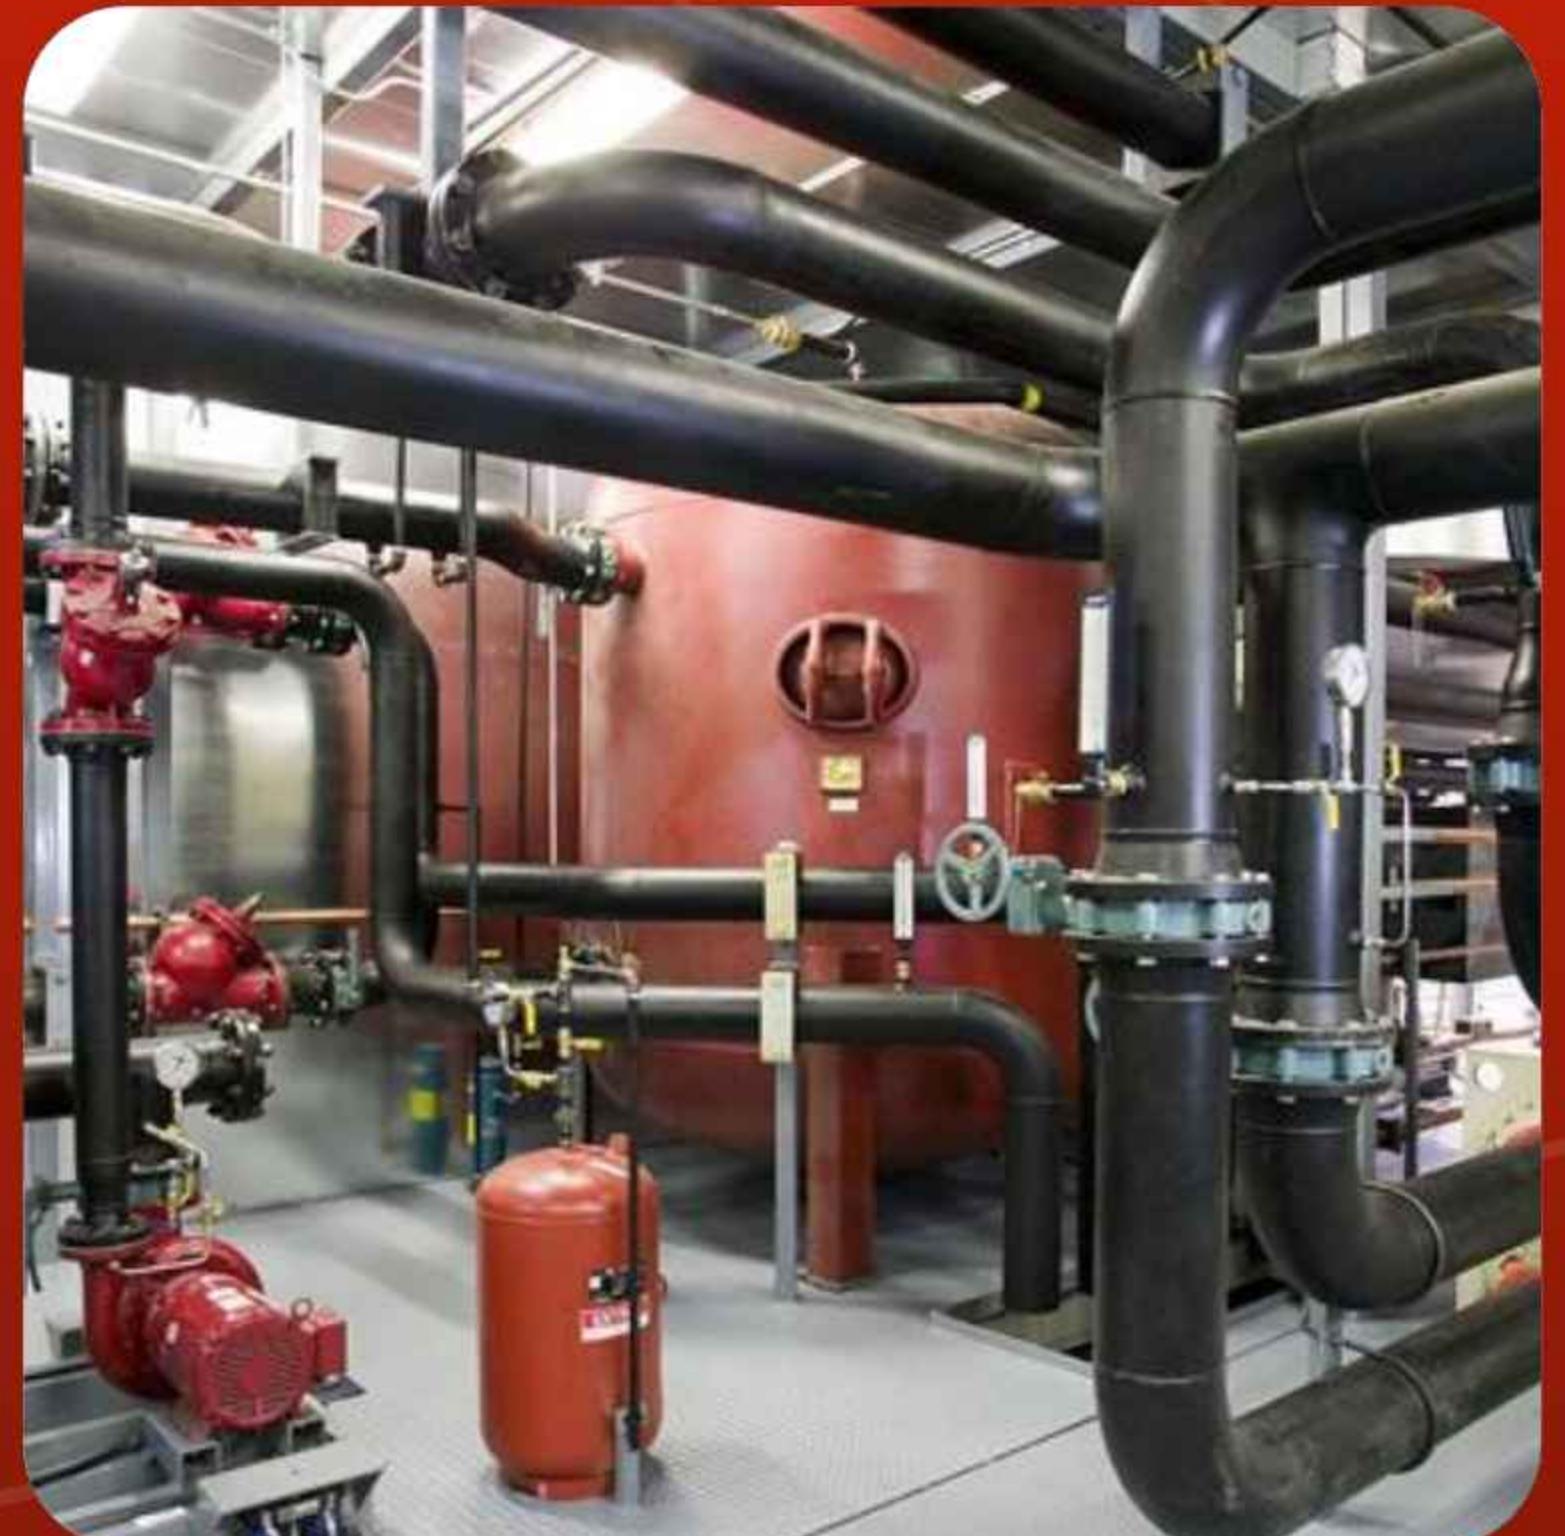

Binanın dış cephesi, çevreye uyumlu bir tasarıma sahip olacak şekilde düşünülmüştür. İç mekan tasarımı, öğrencilerin ihtiyaçlarını karşılayacak şekilde optimize edilmiştir. Her bir odada çalışma masası, yatak ve depolama alanı gibi temel eşyalar bulunacaktır.

MECHANICAL PLUMBING SYSTEMS / MEKANİK TESİSAT SİSTEMLERİ

MMK Metalurji A.Ş Dilovası/Kocaeli Neutralization waste water filtration system. The work done:
1. Stainless steel tank manufacturing.
2. Manufacture and installation of stainless steel pipes.
3. HDPE Pipe Assemblies.
4. All infrastructure works and trenching Works.
5. Isolation of the entire system by rubber insulation.
6. Operate the system by integrating the machines with OSB.
