- Custom colors and branding

PREFABRICATED TOILET SOLUTIONS

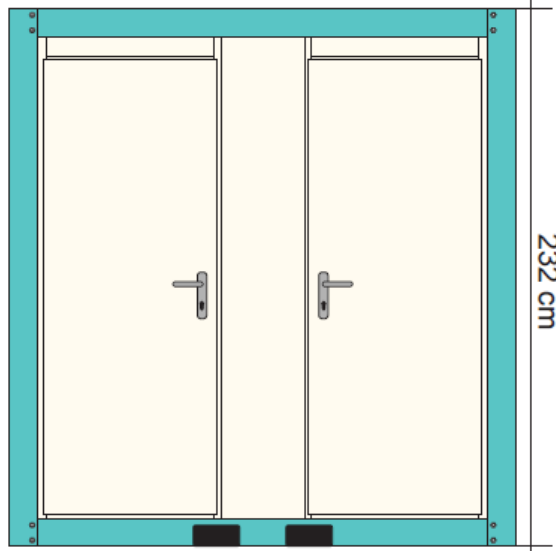

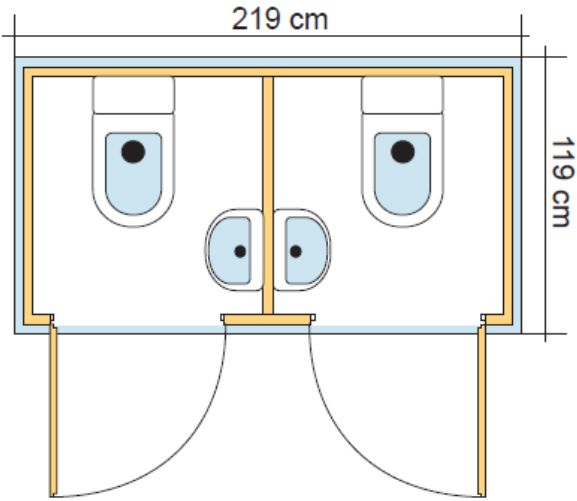

Fast • Hygienic • Cost-Effective

Prefabricated toilets are sanitary units manufactured in factory conditions and delivered ready for use. They are a fast and cost-effective alternative to traditional concrete construction.

- Construction sites
- Public parks and municipalities
- Events and exhibitions
- Camps and recreational areas
- Emergency and disaster relief zones
- Single toilet cabin
- Multi-cabin units (2–4–6–8 units)
- Toilet with washbasin
- Toilet + shower units
- Accessible toilets for disabled users

Technical specifications

- Galvanized steel structural system
- Sandwich panel or fiber cement walls
- Ceramic or non-slip PVC flooring
- Pre-installed water, sewage and electrical systems
- Natural or mechanical ventilation
- Fast production and installation
- Low cost
- Long service life
- Portable and modular structure
- Hygienic and easy to clean

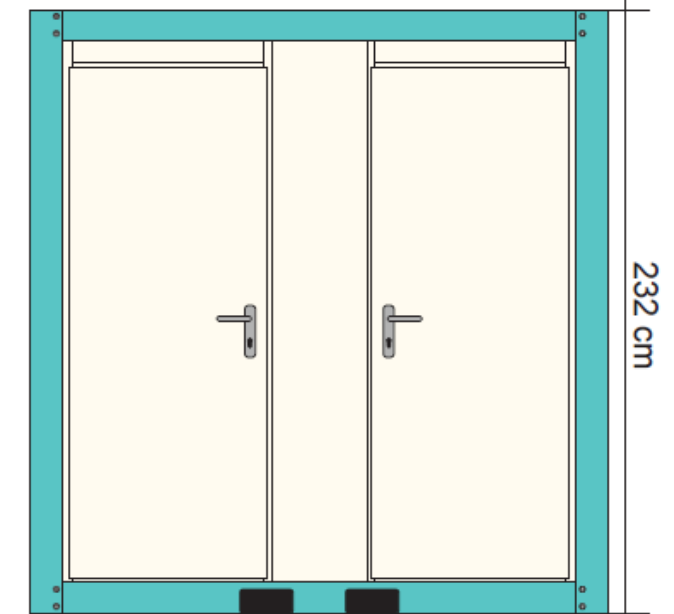

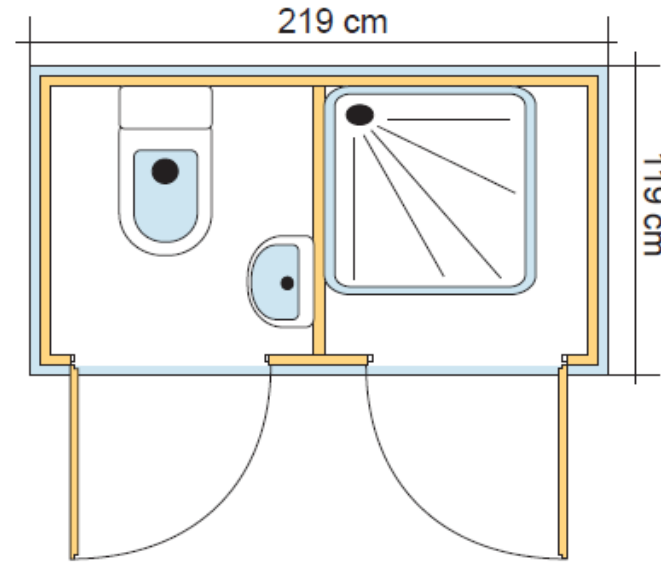

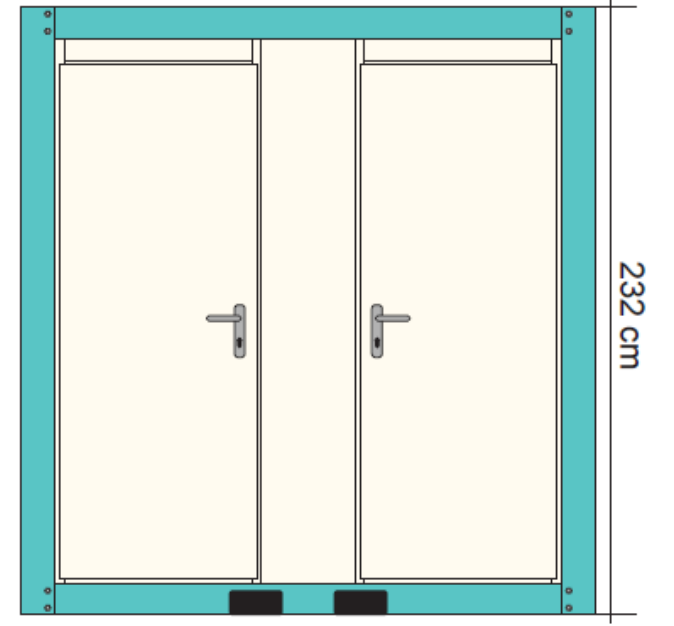

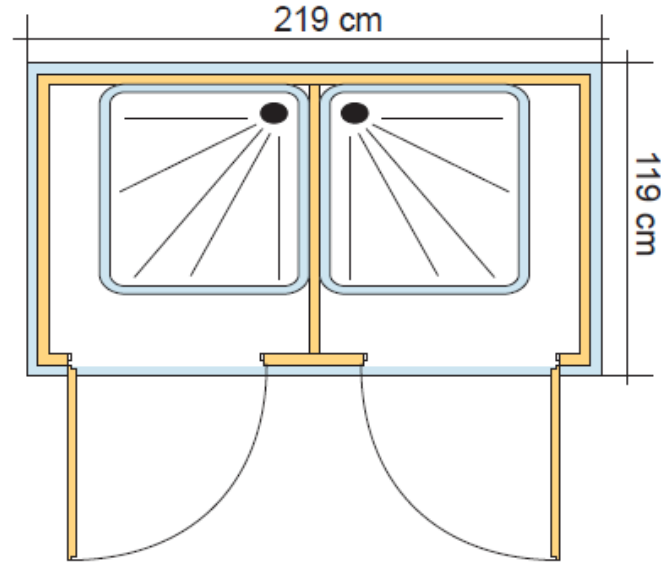

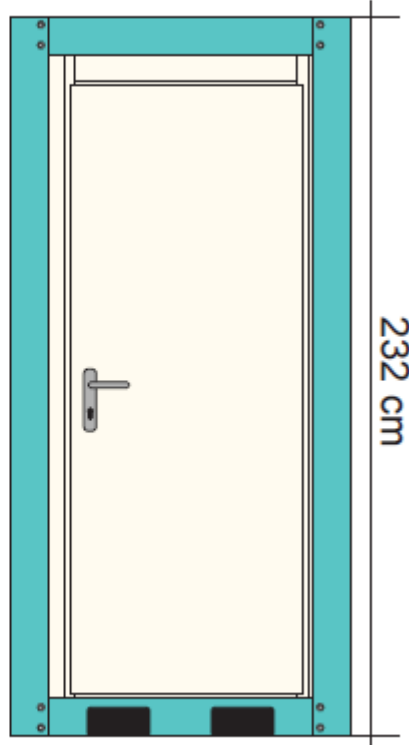

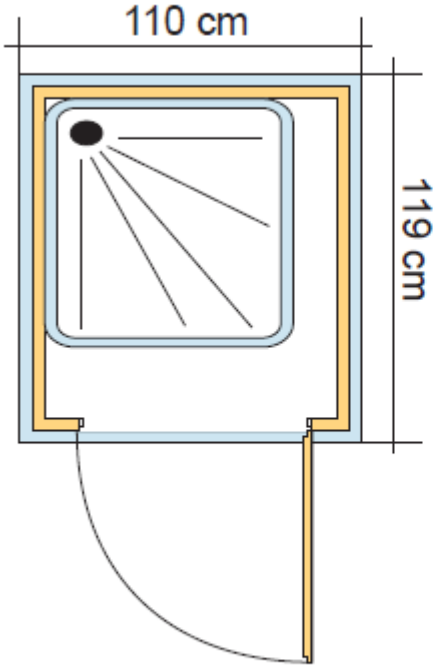

OPTIONAL EQUIPMENT

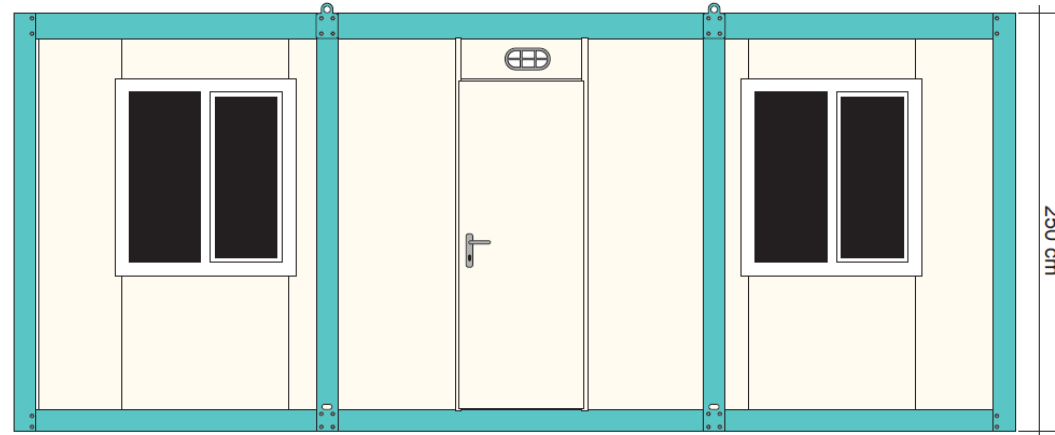

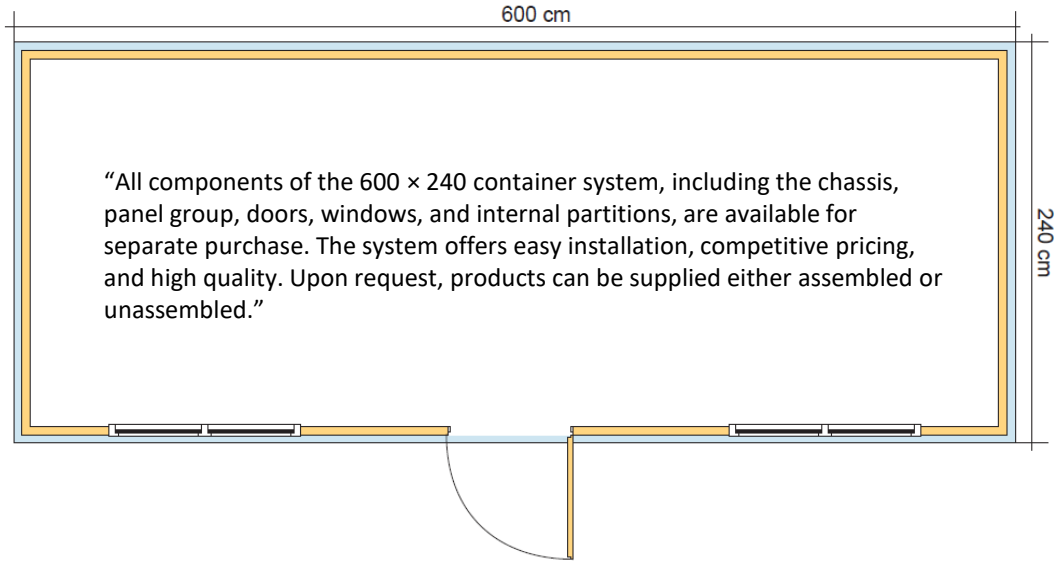

- Sensor-operated washbasins
- Solar-powered lighting
- Stainless steel fittings
- Air conditioning / ventilation fan
- Custom colors and branding

Prefabricated toilet and shower units provide fast and hygienic solutions with easy installation, cost-effective pricing, and high quality standards.

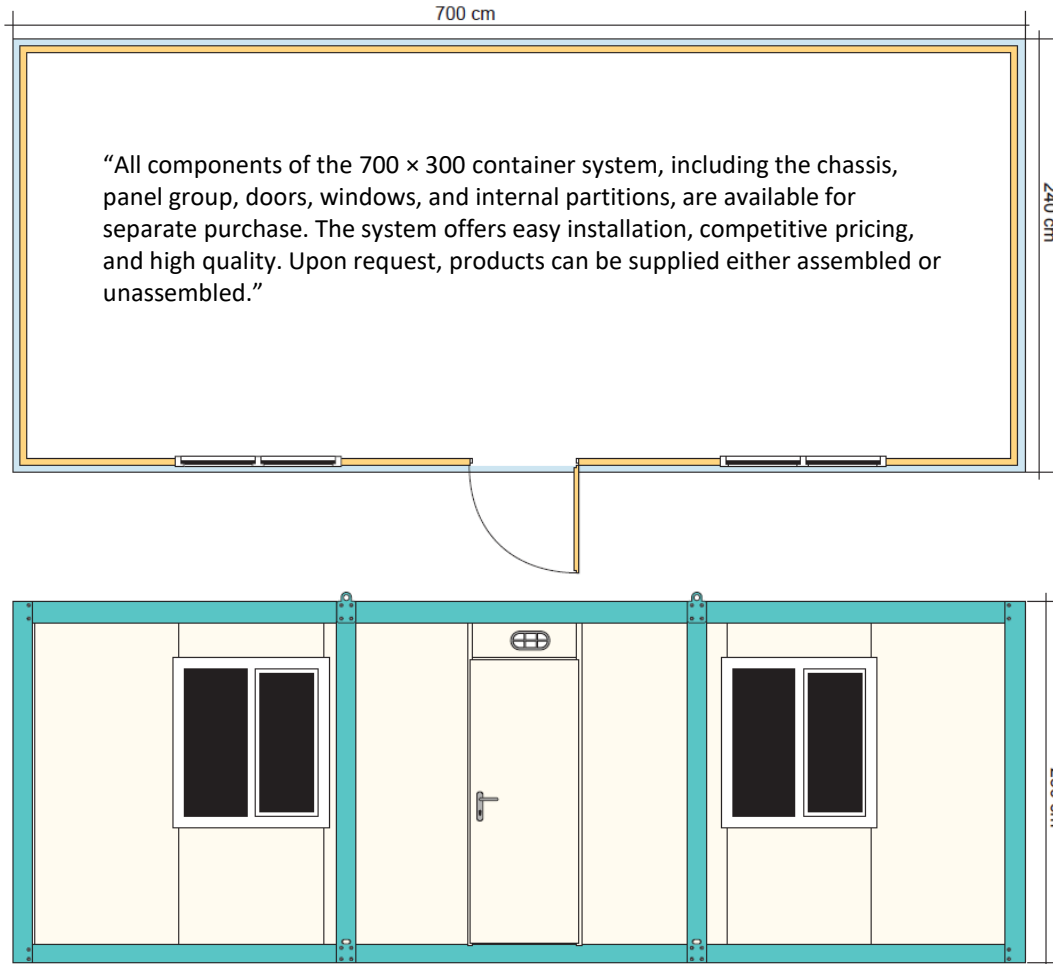

6.00x2.40 m container

OPTIONAL EQUIPMENT

6.00x2.40 m container types

Dimension: 6.0x2.4 m

Type: C601

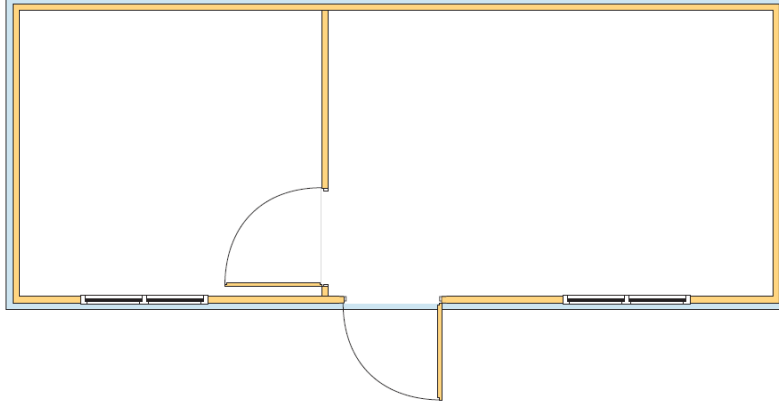

Our 600 × 240 container product can be manufactured in various design configurations based on customer needs and preferences. During the production process, the standard load-bearing chassis components remain fixed, while wall layouts, internal partition planning, and door placements can be customized on a project-specific basis. This approach ensures optimal functionality, efficient space utilization, and full compliance with project requirements.
