GÜRTES is a company that carries out technological studies on structural architecture and applications in construction sector. **GÜRTES** also makes business partnerships with domestic and foreign companies specialized in their own fields and they represent their companies in domestic and foreign markets. Our company engaged in R & D and technological investments related to our sector, we are proud of providing privileged and value added solutions to our customers. **GÜRTES**, as a solution-oriented company, is in an organizational structure that aims at customer satisfaction and continuity in the projects, solutions and applications it has presented by combining all the employees with the highest level of knowledge, research and experience within the workflow in terms of commercial, technical and engineering.

GÜRTES also carries out import, export and contracting works by undertaking the duty of project manager or as a leader of consortium in works requiring cooperation. In these cases, the whole project responsibility is in our company and undertakes all logistics and engineering activities with its trained technical and administrative personnel. These include turnkey, construction and contracting works .

GÜRTES, inşaat sektöründeki yapısal mimari ve uygulamalar üzerine teknolojik çalışmalar yürüten bir firmadır. GÜRTES ayrıca kendi alanlarında uzmanlaşmış yerli ve yabancı firmalarla iş ortaklıkları yapar ve şirketlerini yerli ve yabancı pazarlarda temsil eder. Ar-Ge ve sektörümüzle ilgili teknolojik yatırımlarda bulunan şirketimiz, müşterilerimize ayrıcalıklı ve katma değerli çözümler sunmaktan gurur duyuyoruz. Çözüm odaklı bir şirket olarak GÜRTES, tüm çalışanlarını iş akışındaki en üst düzeyde bilgi, araştırma ve deneyim ile birleştirerek, sunduğu proje, çözüm ve uygulamalarda müşteri memnuniyetini ve sürekliliğini hedefleyen organize bir yapıya sahiptir. ticari, teknik ve mühendislik firmasıdır. GÜRTES, proje yöneticisi görevini üstlenerek veya işbirliği gerektiren işlerde konsorsiyum lideri olarak ithalat, ihracat ve taahhüt işleri yapmaktadır. Bu durumlarda tüm proje sorumluluğu firmamıza aittir ve eğitimli teknik ve idari personeli ile tüm lojistik ve mühendislik faaliyetlerini üstlenir..

Steel Construction Design and Manufacturing

info@gurtes.com.tr

We have **5000 M2 closed steel processing center**. There are all kinds of welding system in our facility.

We never compromise on quality **with our certified welding operators**. All our welded products are manufactured in accordance with the standards.

Our factory has steel cutting machines for cutting twisting machines, **plasma cutting machines** as well as **laser cutting machines** for precision cutting. With our **furnace paint systems**, we have hot dip galvanizing line for metal surface coating.
We have roll form machines for the production of c profile for exterior cladding systems

Project planning and static plans are prepared according to the wishes of our customers by our expert engineers. All manufacturing work orders are removed by this team and all processes are followed in accordance with our quality standards. Our assembly team performs a practical installation without a second application in the field.

Gurtes / some work we do mass production based on customer demand

info@gurtes.com.tr

In line with the demands and demands of our customers, there are many jobs that we customize in steel, stainless and aluminum materials. Customer satisfaction is important to us in all our work without compromising on quality. The success we achieved in our light steel applications, especially in structural architecture, has been presented to the appreciation of our valued customers. In our light steel applications, agricultural special greenhouses are in different business lines that we produce.

Müşterilerimizin talep ve talepleri doğrultusunda çelik, paslanmaz ve alüminyum malzemelerde özelleştirdiğimiz birçok iş var. Tüm çalışmalarımızda kaliteden ödün vermeden müşteri memnuniyeti bizim için önemlidir. Hafif çelik uygulamamızda, özellikle yapısal mimaride elde ettiğimiz başarı, siz değerli müşterilerimizin beğenisine sunulmuştur. Hafif çelik uygulamamızda tarımsal özel seralar da üretimini gerçekleştirdiğimiz farklı iş kolları içerisinde.

Gurtes / Architectural Desing

info@gurtes.com.tr

Architectural design

Our company operates as a solution partner in practical and applied fields such as architecture, design, project management, engineering and consultancy. With our young and dynamic design team and experienced management team, we are bringing our innovative ideas to our customers with our strong technical infrastructure and broad industry experience.

Project management

Our architectural project design and project management team carries out projects in various scales at home and abroad for the leading companies in the field and individuals who have success and rigor at the core of their business.

Residential, mixed-use building, commercial buildings, industrial building projects, hotel projects, office projects, restaurant projects, cafe projects have developed design and project processes based on technical accuracy and iconic foundations by considering customer needs and tastes.

Mimari Tasarım

Firmamız mimari, tasarım, proje yönetimi, mühendislik ve danışmanlık gibi pratik ve uygulamalı alanlarda çözüm ortağı olarak faaliyet gösteriyoruz. İşverenlerimize genç ve dinamik tasarım ekibimiz ve deneyimli yönetim kadromuzla Güçlü teknik altyapımız ve geniş sektör deneyimimiz ile özelleştirilmiş çözümleri müşterilerimize sunarak inovatif fikirlerimizi hayata geçiriyoruz.

Proje Yönetimi

Mimari proje tasarım ve Proje yönetimi ekibimiz, alanında öncü firmalar ve işinin temelinde başarı ve titizlik olan bireyler için yurt içi ve yurt dışında çeşitli ölçeklerde projeler yapar.

Konut, karma kullanımlı bina, ticari yapılar, endüstriyel yapı proje, otel projeleri, ofis projeleri, restoran projeleri, kafe projelerini tasarım temelinde müşteri ihtiyaç ve zevklerini gözeterek teknik doğruluk ve ikonik temeller esas alınarak tasarım ve proje süreçleri geliştirmiş ve projelerini üretmiştir.

Gurtes /construction static projecting

info@gurtes.com.tr

One of the two basic projects that make up a building is an architectural project and the other is a static project. In the architectural project, the target is to plan the building according to user requests and needs. The goal of the static project is the realization of the architectural project.

The architect projects in detail the spaces to meet the needs of the building to be built, their relations with each other, their proportions and their external appearance. It draws floor plans separately for each floor of the building. Expresses the floor plans from the top of the floor in the direction it is facing down. In the floor plan, stairs, walls, doors, windows, covering types are detailed with their dimensions. Columns, beams, floors for the carrier system are not shown in the architectural project. (Structural system is designed by a civil engineer with a static project as we will mention below.)

Bir yapıyı oluşturan iki temel projeden birisi mimari proje diğeri statik projedir. Mimari projede hedef yapının kullanıcı istek ve ihtiyaçlarına göre planlanmasıdır. **Statik proje**de hedef mimari projenin hayata geçirilmesidir. Mimar, inşa edilecek yapının ihtiyaç talebini karşılayacak mekânları, birbirleri ile olan ilişkilerini, oranlarını ve dış görünüşlerini ayrıntılı bir şekilde projelendirir. Yapının farklı her katı için ayrı ayrı kat planlarını çizer. Kat planlarını döşeme üstünden keserek aşağı baktığı yönde ifade eder. Kat planında merdivenler, duvarlar, kapılar, pencereler, kaplama türleri ölçüleri ile birlikte detaylandırılır. Mimari projede taşıyıcı sisteme yönelik kolonlar, kirişler, döşemeler gösterilmez. (Taşıyıcı sistem aşağıda değineceğimiz şekilde inşaat mühendisleri tarafından statik proje ile projelendirilir.) Firmamız tüm projelerinde konusunda uzman mühendis ekibimiz ile statik projelerimizi hazırlamaktayız.

Gurtes / Industrial Structures

Gurtes /Our Reinforced Concrete Prefabricated Production Plant

info@gurtes.com.tr

GÜRTES Business Joint Entrepreneurship. <https://www.Prefabrikbeton.com>

Our factory is located in Düzce Akçakoca. Our total closed area is 10000 m2 and our production capacity is 20000 m3 per month. Our company produces Reinforced Concrete Prefabricated Building Elements. Apart from this activity, it produces Bridge beams and bearing systems.

Fabrikamız Düzce Akçakoca mevkiinde dir. Toplam Kapalı Alanımız 10000 M2 olup Üretim Kapasitemiz Aylık 20000 M3 dür. Firmamız Betonarme Prefabrik Yapı Elemanları üretimi yapar. Bu faaliyetin dışında Köprü kiriş ve taşıyıcı sistemler üretmektedir.

Neutralization waste water filtration system.

The work done:

1. Stainless steel tank manufacturing.
2. Manufacture and installation of stainless steel pipes.
3. HDPE Pipe Assemblies.
4. All infrastructure works and trenching Works.
5. Isolation of the entire system by rubber insulation.
6. Operate the system by integrating the machines with OSB.

Gurtes /Mechanical Plumbing Systems

info@gurtes.com.tr

- *. Indoor water supply systems
- *. installation of heating pipe systems
- *. installation of cooling pipe systems.
- *. Waste water pipe systems.
- *. Design and application of heating boiler room.
- *. Design and application of water treatment systems.
- *. Fire detection and extinguishing systems design and application.
- *. Application of heating and cooling automation systems.
- *. Renewable energy supply systems
- *. Design and application of hot oil systems
- *. Natural Gas Systems design and application

Projecting & Application

Gurtes /Ventilation and air conditioning systems.

info@gurtes.com.tr

- *. Manufacturing and installation of ventilation ducts.
- *. Air conditioning systems design and application.
- *. Fire systems design and application.
- *. Custom fan production.

Ventilation and air conditioning engineering and application

The comfort of life begins with us..

- *. High-voltage power transmission lines.
- *. Design and implementation of substations.
- *. Electrical panels design and manufacturing
- *. Generator systems design and application.
- *. Interior and exterior lighting systems design and application.
- *. Application of indoor and outdoor installation systems.
- *. Design and implementation of camera and security systems.
- *. Design and implementation of intelligent building autonomy systems

Our priority is customer satisfaction. We design and implement living structures.
